

What are the most dangerous parts of your job?

Have you ever fallen on the job? If so, what happened?

Do you ever use gloves while you are working? Why or why not?

Do you speak up when you notice health or safety hazards? Why or why not?

Have you ever hurt your back or another part of your body while on the job? If so, what happened?

Have you ever gotten sick as a result of your job? If so, what happened?

Have you ever seen a consumer smoke while using oxygen in the home?

What do you think keeps direct care providers from speaking up about hazards in the home?
